SpEd Forms X12 HIPAA EDI 4010 to 5010 conversion update

On January 1st the MN DHS upgraded MN-ITS to use the new X12 HIPAA EDI 5010 format. Since then we have been working with a pilot school district to ensure MA Forms works well with the new system before we recommend all other districts submit 5010 837 files.

The pilot district has now successfully submitted 837 production files and is waiting on the associated 835 response. They expect to receive the 35 response tomorrow (01/17). As soon as the response is received we will test the 835 import with the new file format and send instructions to school districts.

We expect you will be able to submit files and import associated responses by Friday. When the program is ready we will send detailed instructions with the steps you need to follow to start using the new MN DHS system. Please do not submit or import 270, 271, 835 or 837 files using MN-ITS until you receive these instructions.

Questions? Please do not hesitate to call Lisa, our third party billing support specialist, 1-866-796-1848.
